

A  
Project Report  
On  
**“Campus Placements Prediction & Analysis”**

By  
**Mr. Rushikesh Joshi**  
**Mr. Vijay Shilwant**  
**Mr. Roshan Dandge**  
**Mr. Shreyash Rajput**

Guided by  
**Dr. Manav A. Thakur**

Department of **Computer Engineering**  
Vidya Prasarini Sabha's college of Engineering  
and Technology, Lonavala.

[2023-2024]

Vidya Prasarini Sabha's College of  
Engineering and Technology, Lonavala.

C E R T I F I C A T E

This is to certify that **Rushikesh Joshi, Roshan Dandge, Vijay Shilwant, Shreyash Rajput** has successfully completed the Project entitled “**Campus Placements Prediction & Analysis** ” “under my supervision, in the partial fulfillment of Bachelor of Engineering (Computer) of Savitribai Phule Pune University, Pune.

Date:

Place: Lonavala

Guide  
**Dr. Manav A. Thakur**

Head of Department  
**Prof. Ragho soni**

External Examiner

Principal  
**Dr. Manav A. Thakur**

**Institute Seal**

## ACKNOWLEDGEMENT

It is a matter of great satisfaction a pleasure to present the dissertation on “**Campus Placements Prediction & Analysis**” with great pleasure we express our deep sense of gratitude to our guide **Dr. Manav A. Thakur** for his valuable guidance, discussion and constant encouragement for successful completion of this project. He gave us suggestion and constructive input time to time in friendly manner, which is perhaps a unique characteristics nature of his mind. We are thankful **Dr. Manav A. Thakur** for all his support and his guidance for all the current work. We are highly obliged to our respected **Dr. Manav A. Thakur** for his kind co-operation and help. We will fail in our duty if we want acknowledge a great sense of graduate to **Dr. Manav A. Thakur** for his kind co-operation. we would like to thank department and library staff at V.P.S. college of engineering and technology, lonavala, for their attitude towards the completion of this project. we would also like to our friends and our parents to help us directly and indirectly in the successful completion this project.

Thanking you,

MR. RUSHIKESH JOSHI  
MR. ROSHAN DANDGE  
MR. VIJAY SHILWANT  
MR. SHREYASH RAJPUT

## ABSTRACT

The "Campus Placements Prediction & Analysis" Android application offers a comprehensive solution for students, recruiters, and educational institutions seeking insights into the competitive landscape of campus placements. With the increasing importance of securing promising job opportunities upon graduation, this app serves as a vital tool for students to make informed decisions and for recruiters to streamline their hiring processes.

For students, the app provides a predictive analysis of their likelihood of getting placed based on various parameters such as academic performance, skills, and extracurricular activities. By inputting their academic records, achievements, and skill sets, students receive personalized predictions on their placement prospects. This not only helps in setting realistic expectations but also empowers them to focus on areas that can enhance their employability.

Recruiters benefit from a vast pool of pre-analyzed student profiles, saving time and effort in the screening process. The app offers a user-friendly interface where recruiters can search for candidates based on specific criteria such as GPA, skills, and preferred job roles. Real-time analytics and data visualization tools enable recruiters to gain insights into trends, such as the demand for certain skill sets in the job market, aiding in strategic recruitment planning.

Moreover, the app serves as a platform for educational institutions to track and analyze the placement trends of their students over time. Administrators can monitor the success rates of different courses, identify areas of improvement in the curriculum, and benchmark their institution's performance against others. This data-driven approach facilitates evidence-based decision-making to enhance the overall quality of education and placement opportunities offered.

Key features of the app include:

1. **Personalized Placement Prediction:** Students can receive predictions on their placement probability based on their academic records and skill profiles.
2. **Recruitment Dashboard:** Recruiters access a dashboard with advanced filters to search and shortlist candidates efficiently.
3. **Real-time Analytics:** Graphical representations of placement trends and demand-supply dynamics empower both students and recruiters with actionable insights.
4. **Institutional Benchmarking:** Educational institutions can compare their placement performance with peer institutions and identify areas for enhancement.

In conclusion, the "Campus Placements Prediction & Analysis" Android app revolutionizes the campus recruitment process by leveraging predictive analytics and data-driven insights. It bridges the gap between students, recruiters, and educational institutions, facilitating better decision-making and improving overall placement outcomes. With its intuitive interface and powerful features, the app stands as a valuable asset in the journey towards successful and fulfilling careers.
